- Category set to d1_mn_GMN

- Assignee set to Roger Dahl

https://gmn-dev.test.dataone.org/mn/node

returns a n html exception instead of a dataone exception (ServiceFailure?)

IOError at /node
[Errno 2] No such file or directory: '/var/local/dataone/mn_generic/service/stores/static/nodeRegistry.xml'
Request Method: GET
Request URL: https://gmn-dev.test.dataone.org/mn/node
Django Version: 1.3
Exception Type: IOError
Exception Value:

[Errno 2] No such file or directory: '/var/local/dataone/mn_generic/service/stores/static/nodeRegistry.xml'
Exception Location: /var/local/dataone/mn_generic/service/../service/mn/views.py in node, line 341

#2 - 2011-09-04 16:47 - Roger Dahl

- Status changed from New to Closed

I had neglected to copy the static Node document over to the server and, because GMN is running in debug mode on the test machines, it returned a Django exception page instead of a DataONE generic ServiceFailure. I've also improved the error message on the ServiceFailure for this situation.
