<b>Milestone:</b>	CCI-0.5		
<b>Product Version:</b>	*		
<b>Description</b>			
the node element contained within objectLocationList/objectLocation should be renamed (back) to "nodeIdentifier" to avoid confusion with the d1 named object. See description of task <a href="#">#884</a> for original description of the confusion. The change is already in the code base (trunk and 0.5 version of the schema).
