

Infrastructure - Bug #1000

objectlocationlist documentation - "node" element collides with "node" object

2010-10-21 06:51 - Rob Nahf

Status:	Closed	Start date:	2010-10-21
Priority:	High	Due date:	
Assignee:	Dave Vieglais	% Done:	100%
Category:	Documentation	Estimated time:	1.00 hour
Target version:	Sprint-2010.42	Story Points:	
Milestone:	CCI-0.5		
Product Version:	*		

Description

the node element contained within objectLocationList/objectLocation should be renamed (back) to "nodeIdentifier" to avoid confusion with the d1 named object. See description of task [#884](#) for original description of the confusion. The change is already in the code base (trunk and 0.5 version of the schema).

History

#1 - 2010-10-22 17:02 - Rob Nahf

- Assignee set to Dave Vieglais

#2 - 2010-10-23 17:14 - Dave Vieglais

- Status changed from New to Closed

Should be correct now with commit [#2467](#).
