<b>Product Version:</b>	*		
<b>Description</b>			
Inside each of the following projects, there a documentation folder that contains stand-alone Sphinx documentation for that project. Need to integrate those with ArchitectureDocs.			
<ul style="list-style-type: none"><li>• GMN</li><li>• Python DataONE CLI</li><li>• d1common (Python)</li><li>• D1 Python ITK</li></ul>			

History

The individual projects should be kept as standalone documents that can be referenced from the architecture documentation. This is preferred to keep the size of the architecture docs to a more manageable size and retain their focus on architecture.

It may be necessary at some point in the future to generate an all-encompassing set of documents that includes operations, architecture, and documentation for specific components and applications.
