Renamed SVN location to itk/d1_client_r. However, the R package name will be different, because in R only letters, numbers, and the dot (.) character are allowed in package names. So, for the within-R package name, I chose to use the Package name 'dataone'. So, to install the package, use:

R CMD INSTALL d1_client_r

and then to load the package library in R use:

library(dataone)

Done.
