Target version:	Sprint-2011.28-Block.4		
Story Points:			
Description Originally we created org.dataone.service as a toplevel package name for the re-useable java service api subpackage cn would contain cn api interfaces, mn would contain the cn api interfaces, and types should contain serializable classes We have added new classes and packages that do not fit into the original categories, we should try to define some more and re-arrange as needed			
Subtasks: Task # 1293: Merge duplication of effort of Serializers in DataONE Common Java Closed Task # 1138: Move DataONE_Common_Java NodeList utilities into a new component Closed Task # 1399: packages in CN Service layer duplicate functionality Closed Task # 1139: Integrate new NodeList Utilities into d1_indexer and d1_synchronization Closed Task # 1624: Review and potentially revise NodeListParser Closed
