

Infrastructure - Bug #1030

objectList from Generic MemberNode has 0.1 namespace

2010-10-28 23:28 - Robert Waltz

Status:	Closed	Start date:	2010-10-28
Priority:	Urgent	Due date:	
Assignee:	Roger Dahl	% Done:	100%
Category:	d1_mn_GMN	Estimated time:	0.00 hour
Target version:	Sprint-2010.44	Story Points:	
Milestone:	CCI-0.5		
Product Version:	*		

Description

When I execute <http://daacmn.dataone.utk.edu/mn/object> or <http://dev-dryad-mn.dataone.org/mn/object>, the objectList xml has the old "<http://dataone.org/service/types/ObjectList/0.1>" namespace attached.

I assume this to be a problem not a specific mn but of the common generic mn impl.

History
