Description

Citation managers such as Zotero are able to extract citation information from web pages that are appropriately marked up.

The goal is to support marking up of the output from Mercury search pages such that citations for discovered data sets can be imported to Zotero.

Identify the CoiNS (http://www.zotero.org/support/dev/making_coins) / RDFa markup used by Zotero and implement for Mercury search results page (citation)

Subtasks:

Task # 1205: Document the intended output markup for Zotero import	**Closed**
Task # 1206: Create test documents for evaluating import process	**Closed**
Task # 1207: Modify Mercury html output to support markup for discovered datasets	**Closed**
Task # 1208: Test and and review the citation import process	**Closed**
