Infrastructure - Task #1205

Story # 1204 (Closed): Enable microformat or RDFa tagging of Mercury results pages for import to citation manager application

Document the intended output markup for Zotero import

2011-01-07 16:13 - Dave Vieglais

Status:	Closed		**Start date:**	2011-01-07
Priority:	Normal		**Due date:**	
Assignee:	Giri Palanisamy		**% Done:**	100%
Category:	d1_mercury		**Estimated time:**	0.00 hour
Target version:	Sprint-2011.07			
Milestone:			**Story Points:**	
Product Version:	*			

Description

History

#1 - 2011-01-26 16:01 - Giri Palanisamy

- Status changed from New to In Progress

The pilot catalog will add CoiNS tags for the search results (on the brief page, where we list the datasets/documents)

Initial prototype will contain the following tags:
rft.title : title
rft.date :publication date
rft.aucorp : contact organization
rft.au : author
rft_id : download link or DOI (we will add DOI for ORNL DAAC records for others it will be mostly the url)

For the initial protoype; for the documents with no download link or DOI, we will still add the CoiNS tags but exclude those rft_id

#2 - 2011-02-21 17:15 - Dave Vieglais

- Status changed from In Progress to Closed

Prototype implementation complete.
