Milestone:		**Story Points:**	
Product Version:	*		

Description

MNode.listObject(....) does not allow parameterless URLs to be created, and some parameters of the method cannot be set to null (replicaStatus,start,count)

What would be best is a base method (where everything is "null-able") along with convenience methods

Need to keep in mind that CNode subclasses do not support AuthTokens.

Subtasks:

Task # 1231: refactor MN.listObjects(...) method to allow no parameters	**Closed**
Task # 1228: create parameterless listObjects() in D1Node	**Closed**
