

Infrastructure - Bug #1295

"View full metadata" on Mercury search results page doesn't work

2011-02-04 19:34 - Dave Vieglais

Status:	Closed	Start date:	2011-02-04
Priority:	Normal	Due date:	
Assignee:	Robert Waltz	% Done:	100%

Target version:	Sprint-2011.07	Story Points:	
Milestone:	CCI-0.5		
Product Version:	*		

Description

Attempting to view the full metadata record on Mercury search results on the CNs fails with file not found error - not clear if this is simply because the index is out of sync or if there's some changes required in the mercury link to data / metadata retrieval.

History

- Assignee changed from Giri Palanisamy to Robert Waltz

#2 - 2011-02-09 18:32 - Dave Vieglais

example of index document that may help with debugging this issue:

[http://cn-dev.dataone.org/datanet_solr/select/?q=id%3A\[*\]+TO+*&version=2.2&start=15&rows=1&indent=on](http://cn-dev.dataone.org/datanet_solr/select/?q=id%3A[*]+TO+*&version=2.2&start=15&rows=1&indent=on)

#3 - 2011-02-09 18:33 - Dave Vieglais

As Matt pointed out, it may be possible to reference the metacat view of the record, eg.:

<http://knb-mn.ecoinformatics.org/knb/metacat/jones.359.4/default>

so the pattern might be something like:

<http://cn.dataone.org/knb/metacat/{IDENTIFIER}/default>

#4 - 2011-02-09 18:43 - Matthew Jones

The pattern is:

http://cn.dataone.org/knb/metacat/{IDENTIFIER}/{DISPLAY_SKIN}

where DISPLAY_SKIN can be one of the installed metacat skins, such as 'default', 'knb', 'nceas', 'esa', 'sanparks', etc. This key is basically tied to a set of xslts and css files that are used to create the HTML view from the XML.

Note that the IDENTIFIER has to be the local metacat identifier -- it can't be a DataONE pid unless that pid happens to correspond to the native metacat identifier format (e.g., jones.1.1). It would be good to expand this to support arbitrary pids in the future.
