

Infrastructure - Task #1330

Story # 1906 (Closed): Review, revise, and update architecture documentation

REST interface docs

2011-02-09 22:28 - Roger Dahl

Status:	Closed	Start date:	2011-02-09
Priority:	Normal	Due date:	
Assignee:	Dave Vieglais	% Done:	100%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	Maintenance Backlog	Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		
Description			
We need some notation to describe how the different arguments are passed in the REST interface. For instance, MN_crud.update() has PID in the URL, and obsoletedPID in an MMP field, but there's no difference between them in the argument list. Possibilities include URL, HTTP header, MMP field, MMP file.			

History

#1 - 2011-11-01 15:26 - Roger Dahl

- Category set to Documentation
- Assignee set to Dave Vieglais
- Parent task changed from #1329 to #1906
- Milestone set to CCI-1.0.0

#2 - 2011-11-07 15:21 - Dave Vieglais

- Status changed from New to Closed

Parameters passed in the URL are indicated as such in the URL template. All other parameters are placed in the request body unless explicitly indicated otherwise, such as values transmitted in the HTTP header of the request. This is documented in http://mule1.dataone.org/ArchitectureDocs-current/apis/REST_overview.html

#3 - 2014-10-02 17:21 - Dave Vieglais

- Target version set to Maintenance Backlog
