Description Another important feature we need to add sooner rather than later, is version tagging of all libraries and apps. For stuff on trunk, this would be the svn revision. For things tagged as versions, it would be the version number (or perhaps a combination of both). The version info should be easily discoverable from command line, tests, and where appropriate, web interfaces.	
Subtasks:	
Task # 1405: Infrastructure monitoring: add \$VERSION to scripts, etc.	Closed
Task # 1439: Define an API call for retrieving version information from each package / ...	Rejected
