Description			

History

#1 - 2011-03-10 13:36 - Dave Vieglais

The exception xml serialization changed slightly to include "pid" as an optional attribute on the exception element. The Java implementation needs to be updated to reflect this change. e.g.:

```
<error name='NotFound'
      errorCode='404'
      detailCode='1020.1'
      pid='123XYZ'>
<description>The specified object does not exist on this node.</description>
<traceInformation>
  method: mn.get
  hint: http://cn.dataone.org/cn/resolve/123XYZ
</traceInformation>
```

#2 - 2011-03-10 20:31 - Rob Nahf

- Status changed from New to Closed
- % Done changed from 0 to 100
- Estimated time set to 3.00

updating D1RestClient (deserializeXML method and the internal errorElements class), d1_common_java BaseException and BaseExceptionTest classes.
