History

#1 - 2011-04-07 01:46 - Matthew Jones

- Status changed from New to In Progress

#2 - 2011-04-07 01:49 - Matthew Jones

- Category set to Documentation

- Milestone set to 2011-Block-2

Added new types for Authz and Authn, including AuthToken, AuthSession, Challenge, EncryptedNonce, X509Certificate, Person, Group, Principal, PrincipalList, and others.

Need to review these types with Dave and get feedback. If no comments, then can close this task.

Only question is on Types.Permission. The interpretation of a permission is "Permissions are cumulative, in that higher level permissions include all of the priveledges of lower levels (e.g., given write access, one also implicitly has read access)."

This means that execute access implies WRITE and CHANGEPERMISSION access which seems a bit liberal.

#4 - 2011-04-08 16:10 - Matthew Jones

Its supposed to be the other way around, in that CHANGEPERMISSION implies WRITE. I'll fix that.
