History

#1 - 2011-04-06 18:12 - Matthew Jones

- Subject changed from Clarify that getAuthSession is only accessible to MNs and CNS to getAuthSession only accessible to MNs and CNS

Document that getAuthSession is only accessible to MNs and CNs. This means we need an MN and CN identity for each node, and that the request for the getAuthSession originates from one of those known entities. There is a bootstrapping problem here in enforcing this policy that we need to design around.

#2 - 2011-08-30 15:52 - Matthew Jones

- Status changed from New to Rejected

- Milestone set to None

No longer relevant under new design of SSL-based authentication.
