Description
xml_access table supports more features than the D1 accessPolicy schema so it should be a lossless translation to store this information in xml_access

- Status changed from New to Closed

- % Done changed from 0 to 100

now reading and writing access policy rules defined in system metadata to the xml_access table in metacat.

#2 - 2011-06-06 23:12 - Ben Leinfelder

xml_access now has a guid column - system metadata records use this rather than docid.
I'm considering removing the docid attribute [eventually].
