History

#1 - 2011-06-06 17:32 - Dave Vieglais

- Status changed from New to In Progress

Discussion on 2011-06-06:

1. It is a good thing to be able to set the permissions on multiple objects at once.

2. The mechanism for (1) should be a new API call rather than the current approach of overloading the setAccessPolicy method, as the AccessPolicy type definition confusing when used in two way - one to define the access control rules for a single object (in system metadata), the other as a mechanism for settign the access control on multiple objects (through the setAccessPolicy method).

Conclusions:
1. remove "resource" from AccessRule.
2. create a new authorization API method that enables setting the access rules on multiple objects with a single call.

#2 - 2011-06-06 17:33 - Dave Vieglais

- Category set to Authentication, Authorization

#3 - 2011-06-07 15:51 - Dave Vieglais

- Status changed from In Progress to Closed
