<b>Target version:</b>	CCI-0.3 Deployed	<b>Story Points:</b>	
<b>Milestone:</b>	None		
<b>Product Version:</b>	*		

#### Description

Need to document location of, and access to the test server being built for CN development.

- IP / DNS
- Administrator
- Accounts with access

Complements notes in <source:/software/cicore/trunk/cn-buildout>

See also [#141](#)

#### History

##### #1 - 2010-01-14 09:06 - Matthew Jones

See <source:/software/cicore/trunk/cn-buildout> for complete notes. Synopsis is:

Host for development server is:

cn-dev.dataone.org -> 128.111.220.50

Accounts are controlled through LDAP, with any valid LDAP account on ldap.ecoinformatics.org that is also in the group dataone-sysadmin eligible for access.

Administrator is: brand

Additional accounts with sudo root access: jones, vieglais

Additional accounts (current, more later): daigle, dahl, palanisamy

##### #2 - 2010-01-14 14:18 - Giri Palanisamy

Can you also create an account for Jim Green? thanks!

##### #3 - 2010-01-14 14:51 - Dave Vieglais

Jim should already have an account - confirm that Jim can log on to trac.dataone.org, and while there check that the correct email address appears in the preferences page (link at top right once logged in).

##### #4 - 2010-01-28 23:23 - Matthew Jones

Server is documented in this bug, as well as in the cn-buildout/SystemConfiguration.txt file.

Green has an account, and it is working.

Closing as fixed.
