Infrastructure - Task #1636

Story # 1627 (Rejected): remove Metacat dependency on d1_libclient_java

move MetacatPopulator out of Metacat

2011-06-08 18:22 - Ben Leinfelder

Status:	Rejected		**Start date:**	2011-06-08
Priority:	Normal		**Due date:**	
Assignee:	Ben Leinfelder		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:	Sprint-2011.23-Block.3			
Milestone:			**Story Points:**	
Product Version:	*			

Description

As far as I know this is a testing utility that is used to take metadata/data from one Metcat and insert it into another using the D1 clients.
We could likely find home in libclient_java for this (there only three mild dependencies it has on Metacat classes)

History

- Status changed from New to Rejected

While I did take out the DataoneEMLParser references in the MetacatPopulator class, it still will need to use D1Client and MNode to do it's work (inserting records from a source Metacat to a target MN).
I'm putting this off for now until we have a clear idea of how to best support MN-MN communication and whether or not that can make use of the libclient_java packages
