Milestone:			**Story Points:**	
Product Version:	*			

Description

I propose this modified class signature

package edu.ucsb.nceas.metacat.service;

import org.dataone.service.ObjectFormatService;
.....

public class ObjectFormatServiceMetacatImpl extends BaseService implements ObjectFormatService {
// implement required ObjectFormatService methods here but also keep it a Metacat "service" as needed
}

History

- Status changed from New to Closed

The CNCoreimpl class implements the entire CNCore interface. Because of this, we can remove ObjectFormatService, and have ResourceHandler call CNCoreImpl directly. This simplifies the chain.
