History

#1 - 2011-06-21 21:14 - Chris Jones

We'll use one class to implement the CNode service:

CNodeService extends D1NodeService implements CNCore, CNRead, CNAuthorization, CNIdentity, CNregister, CNReplication

#2 - 2011-06-23 14:40 - Chris Jones

- Status changed from New to In Progress

Stub methods are all created. Still need to migrate functions from CNCoreImpl.

#3 - 2011-06-30 13:48 - Chris Jones

Thus far implements CNReplication, CNAuthorization, CNRead except search() (not proxied so throws NotImplemented), CNCore except reservelidentifier() ( listNodes() is not proxied so throws NotImplemented)

#4 - 2011-07-11 18:20 - Ben Leinfelder

- Status changed from In Progress to Closed

- Milestone set to CCI-0.6.2
