Target version:	Sprint-2012.07-Block.1.4		
Milestone:	CCI-0.6.4	**Story Points:**	
Product Version:	*		

Description

schema.xml defines the fields that are available in the SOLR search engine that is used by Mercury. Need to ensure that the entries are properly populated by the indexing process and do not conflict with the additional fields required to support access control and other system metadata and resource map fields.
