#### Description

A request to /formats/{fmtid} with a fmtid that contains a slash (e.g. text/csv) is escaped according to RFC3986, e.g.:

<https://cn-dev.dataone.org/knb/d1/cn/formats/text%2Fcsv>

The response from the service suggests that the encoded slash is not handled correctly:

```
<?xml version="1.0" encoding="UTF-8"?>
```

The format specified by csv does not exist at this node.

- Status changed from New to Closed

Not using lastIndexOf("/") any more (in Metacat implementation).
