Infrastructure - Task #1783

Task # 1782 (Closed): CN Replication components should be separated for scalability

Create the ReplicationManager class to manage MN ReplicationTasks

2011-09-11 19:41 - Chris Jones

Status:	Closed	**Start date:**	2011-09-12
Priority:	Normal	**Due date:**	
Assignee:	Chris Jones	**% Done:**	100%
Category:	d1_replication	**Estimated time:**	0.00 hour
Target version:			
Milestone:	CCI-0.6.4	**Story Points:**	
Product Version:	*		

Description

Move org.dataone.service.cn.replication.v1.ReplicationService to org.dataone.service.cn.replication.v1.ReplicationManager and remove the CNReplication methods. Verify that this method will listen to changes to the hzSystemMetadata map as a HazelcastClient to the Hazelcast storage cluster initialized by Metacat. Verify that this class accesses the hzNodes map in the processing cluster as a Hazelcast member (not client).

Subtasks:

Task # 1790: Create ReplicationManagerTest class to test ReplicationManager	**Closed**

History

#1 - 2012-01-03 16:48 - Chris Jones
