| Target version: | Sprint-2012.07-Block.1.4 | Story Points: | |
| Milestone: | CCI-1.0.0 | | |
| Product Version: | * | | |
| Description | | | |
| Content transferred between member nodes during replication needs to be verified for byte transfer accuracy before committing the data store. | | | |
| The checksum of the retrieved object should be computed and compared with the checksum reported in the system metadata for the object. An error should be raised if the checksums do not match. | | | |

History

- #1 - 2011-11-11 17:09 - Roger Dahl
 - Target version set to Sprint-2011.45-Block.6
 - Milestone changed from CCI-0.6.4 to CCI-1.0.0
- #2 - 2012-02-27 18:16 - Roger Dahl
 - Status changed from New to Closed
