**Description**

May want to review this with everyone to make certain it still makes sense.

These objects may be replicated to Tier 4 nodes that will have the ability to allow their owner's to read them.

Propose that this issue be rejected at 09/05/2012 standup meeting

**History**

It is not clear if sync should fail in this situation.

The CN can still register the existence of the object, it just wont be visible to to the public user, which is ironic since the content was served from a public site, but not really an error condition.

I'm going to vote 'no' on this too. Sure, it might feel a little odd, but maybe they intend to update the accessPolicy after a month or two on the CN, like lifting an embargo.

*- Target version changed from Sprint-2012.27-Block.4.2 to Sprint-2012.29-Block.4.3*

Ok, sounds like I can reject this one. But, bring it up formally one of these days in a meeting, make certain everyone is in agreement.

**#8 - 2012-07-31 01:09 - Dave Vieglais**

*- Milestone changed from CCI-1.0.3 to None*

*- Target version changed from Sprint-2012.29-Block.4.3 to Sprint-2012.33-Block.5.1*

Deferring this for a discussion item at the CCIT meeting.

It seems reasonable to reject this, but there should be some sort of follow up mechanism that indicates if content has been non-public for longer than some "reasonable" period.
