Description

JibX Marshalling needs to be extended for our Node Controller to extend the IXMLWriter by overwriting the writeXMLDecl method. Set on the IMarshallingContext the XmlWriter the extended XmlWriter. Probably implement the org.springframework.oxm.Marshaller in a new class.

and create the xsl for transformation.

- Status changed from New to Rejected

I'm using our d1_common TypeMarshaller + piped input/output streams to accomplish this in the CN proxy layer.
