Description

Project POM has the following elements.

If the project packaging is jar, and the jar file contains java classes, there must be a -javadoc.jar for main artifact.
If the project packaging is jar, and the jar file contains java classes, there must be a -sources.jar for main artifact.
All project artifacts are signed using GPG, and the public key is distributed to hkp://pool.sks-keyservers.net/. For more information, please refer to How To Generate PGP Signatures With Maven.
