#### Description

The system metadata schema

[source:software/cicore/trunk/schemas/COORDINATING\\_NODE\\_SYSMETA.XSD](source:software/cicore/trunk/schemas/COORDINATING_NODE_SYSMETA.XSD)

has place holder values for enumerated strings. These need to be replaced with real values.

e.g. [ChecksumAlgorithm](#) should be "SHA-1", "SHA-224", "SHA-256", "SHA-384", "SHA-512" conforming to the algorithms listed in the "Federal Information Processing Standard 180-2, Secure Hash Standard":
