#### Description

Metacat currently provides a MN id during registration, but newer versions of the CN.register() service set the id and return it to the caller. Need to record this in metacat.properties when it is sent back. Also, remove it from the editable properties in the configuration screen.

#### History

##### #1 - 2011-11-23 18:52 - Ben Leinfelder

- Status changed from New to Closed

- Assignee changed from Matthew Jones to Ben Leinfelder

I am now recording the returned Nodeld on successful registration. The Nodeld should remain in the configurable properties because redeployments (upgrades) of Metacat should use their existing Nodeld and they'll need to set it.
