Infrastructure - Story #2000

Edits for API docs and implementations for consistency

2011-11-04 19:15 - Dave Vieglais

Status:	Closed	**Start date:**	2011-10-27
Priority:	High	**Due date:**

Target version:	Sprint-2011.49-Block.6		
Story Points:			

Description

There are several areas where inconsistency is present in the documentation and implementations. For example, camelCase is used in some locations, whereas lowercase is used in others.

This story contains an accumulation of known inconsistencies that should be resolved prior to final release.

By cataloging the necessary changes and performing them all at once across systems, we expect that thrashing while implementing the changes (complete in some places but not others) will be minimized.

Subtasks:

Task # 1937: MNRead.listObjects() - Naming of startTime and endTime params.	**Closed**
Task # 1935: URL query parameter names a mix of camelCase and all lowercase in docs	**Closed**
Task # 2021: some methods take session object but don't throw InvalidToken	**Closed**
Task # 2022: duplicate NotImplemented exception for listObjects methods	**Closed**
Task # 2023: InsufficientResources usage	**Closed**
Task # 2024: consider renaming getChecksumAlgorithms to listChecksumAlgorithms	**Closed**

History

#1 - 2011-11-28 18:43 - Dave Vieglais

- Position changed from 1 to 319

- Target version changed from Sprint-2011.46-Block.6 to Sprint-2011.48-Block.6

- Position set to 1

#2 - 2011-12-06 14:43 - Dave Vieglais

- Position set to 7

- Target version changed from Sprint-2011.48-Block.6 to Sprint-2011.49-Block.6

- Position deleted (320)

#3 - 2011-12-13 00:28 - Dave Vieglais

- Status changed from New to Closed
