Milestone:	CCI-1.0.0		**Story Points:**	
Product Version:	*			

Description

CNReplication.updateReplicationMetadata()
CNReplication.setReplicationPolicy()

These specify that they operate on sysmeta, but that's true for all the calls that update things, like setAccessPolicy, so no need to specifically mention it here, unless I've misunderstood something.

So: Updates the replication policy entry for an object by updating the system metadata. -> Updates the replication policy for an object.
