<b>Milestone:</b>	CCI-1.0.0		
<b>Product Version:</b>	*		

#### Description

On success, CNCore.reserveldentifier(session, pid) returns the same PID that was passed in. Of course, the caller already knows which PID he passed in. We can return a boolean instead.

#### History

##### #1 - 2011-12-08 16:19 - Dave Vieglais

- Status changed from New to Rejected

There is a possibility that the passed in string may be modified - e.g. removing leading or trailing whitespace. Hence the reserved PID is returned.

##### #2 - 2014-10-02 17:21 - Dave Vieglais

- Target version set to Maintenance Backlog
