Target version:	Sprint-2011.51-Block.6		
Milestone:	CCI-1.0.0	**Story Points:**	
Product Version:	*		

Description

I think we should consider changing rightsHolder to owner. I think we're already inclined to think of the rightsHolder in terms as the owner. The description of rightsHolder says it's a list of owners. And the REST method to update it is CNAuthorization.setOwner().

And, when I see "rightsHolder", I keep thinking "copyright" :)

History

#1 - 2011-12-12 16:48 - Dave Vieglais

- Status changed from New to Rejected

Discussed and rejected. Use is in alignment with broader use of the terms (ownership and rights holder). Documentation should be clarified though to indicate such.

The method setOwner() should be changed to setRightsHolder() (done)
