Description

When given this identifier:

common-unicode-supplementary-escaped-

History

#1 - 2012-04-16 03:50 - Roger Dahl

- Priority changed from Normal to Low

The description of this bug is truncated because Track itself does not handle Unicode supplementary characters, which the description contained.

I'm setting the priority on this to low, not because it's not important, but because I'm collecting all my tickets that I think can wait until after first public release under "low".
