Description

Rewrite the docs for Types.DateTime to make it clear that there are three different formats:

- HTTP Full when it's passed in HTTP headers
- YYYYMMDDTHHMMSS[.mmm]+00:00 or +Z when passed in URLs.
- xsd:datetime when passed in XML.

Add text:
- Timezone is mandatory and must be UTC (avoid "GMT").
- Fraction of second has a maximum resolution of 1ms and is optional.
