Target version:	Sprint-2012.01-Block.1.1			
Milestone:	CCI-1.0.0		**Story Points:**	
Product Version:	*			

Description

Synchronization was originally overriding CNode in order to use a localhost url directed against metacat's CN implementation.

We should now be using the default CNode implementation via d1Client class overwriting the property D1Client.CN_URL in d1client.properties.

NodeCommD1ClientFactory should be creating a single d1client and pulling CNode and MNode implementation out of it.
