Milestone:	None		**Story Points:**	
Product Version:	*			

Description

I use SpringSource Tool Suite for the CnService development. It is an Eclipse variant. I recognize that other developers may not wish to maintain two copies (or more) of eclipse at any given time. Therefore, I should write a guide for developing with a standard eclipse distribution. I decided on JEE Eclipse. If you to want add in all the correct plugins to do EE development from the Java or Classic build, I can only wish you luck.
