I'm sure there's a reason, but why have this specialized method when there is a CN.updateSystemMetadata() method that could be used for such a thing?

- Status changed from New to In Progress

Rest endpoint requires some discussion.

Proposal is:

PUT /meta/obsoletedby/{pid}

But this depends on correctly interpreting /meta/obsoletedby as a service endpoint rather than a pid = obsoletedby

- Status changed from In Progress to Closed

REST endpoint switched to PUT /obsoletedBy/{pid}
