Target version:	Sprint-2012.05-Block.1.3			
Milestone:	CCI-1.0.0		**Story Points:**	
Product Version:	*			

Description

The following SOLR fields are not needed by the DataONE Mercury interface and can be removed from the SOLR schema:

- cat
- distribution
- features
- includes
- manu
- name
- variableName

History

#1 - 2012-01-11 16:46 - Dave Vieglais

Also the copy fields:

- manu_exact
- distributionText

And the deprecated:

- executePermission

field need to be removed from the schema.

#2 - 2012-01-11 21:04 - Skye Roseboom

Investigate on deploying a modified schema file on existing solr install. May need to clear out solr index data, then install new schema.xml. Only a concern for cn-dev-2 where index is installed already.

#3 - 2012-01-11 21:28 - Skye Roseboom

- Status changed from New to In Progress

#4 - 2012-01-11 22:25 - Skye Roseboom

- Status changed from In Progress to Closed

Complete. Only field with index generation rule defined was executePermission which was removed from the system metadata configuration.   All

fields removed from official solr schema 'index-solr-schema.xml' found in d1-cn-index-processor project.

Updated index-solr-schema.xml placed in buildout project.
