Target version:	Sprint-2012.05-Block.1.3	Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		
Description			
Refactor and test the solrIndexBuildTool so that it uses hzIdentifiers data structure instead of just iterating over the system met data map. Entries in the systemMetadata map may have been evicted. hzIdentifiers should provide complete list of system metadata ids.

Complete. Tested on cn-dev-2, object list count is now equal to index size count again.

Simple fix using the 'hzIdentifiers' set which contains entire set of system metadata identifiers.
