Infrastructure - Task #2270

Story # 2067 (Closed): Refactor the index task generator and processor to improve scalability and performance

Restrict access to solr update to localhost

2012-01-31 14:57 - Skye Roseboom

Status:	Closed		**Start date:**	2012-01-31
Priority:	Normal		**Due date:**	
Assignee:	Skye Roseboom		**% Done:**	100%
Category:	d1_indexer		**Estimated time:**	0.00 hour
Target version:	Sprint-2012.05-Block.1.3			
Milestone:	CCI-1.0.0		**Story Points:**	
Product Version:	*			

Description

Restrict sole's update url from being invoked - except by requests originating from localhost.   To restrict update/delete of index data.

History

#1 - 2012-01-31 14:59 - Skye Roseboom

- Target version changed from Sprint-2012.03-Block.1.2 to Sprint-2012.05-Block.1.3

#2 - 2012-01-31 15:01 - Skye Roseboom

- Status changed from New to In Progress

updating solr_mod.jk in dataone-solr buildout to restrict.

CN indexing component will connect to tomcat/solr through localhost, not through apache/mod_jk.

Just need to coordinate what if any solr endpoints to expose through mod_jk.

#3 - 2012-02-02 23:17 - Skye Roseboom

- Status changed from In Progress to Closed

Updated solr's mod_jk configuration to only expose select endpoint for both solr cores through apache.

CN components can connect to solr through tomcats localhost http port for solr communication.
