Description

Log on through cn-sandbox-ucsb-1.dataone.org/portal uses the wrong server name of cn-dev.dataone.org

This should probably be set during the installation process of the package or determined from the host name of the server.

To reproduce:

visit <https://cn-sandbox-ucsb-1.dataone.org/portal/>

click "Begin Login"

Select an Identity Provider

Click "LOG ON"

History

#1 - 2012-02-08 18:22 - Ben Leinfelder

- Status changed from New to Closed

Now using the hostname found on the deployment server (hostname -f) as the configured value for the host in the CN URL. Default is

<https://cn.dataone.org/cn>

Deployed/tested on cn-dev.dataone.org.

Included in cn-buildout

#2 - 2012-02-10 22:29 - Ben Leinfelder

Also realized the `cfg.rdf` file had host-specific configuration values. Those are now being updated during the debian post install script
