Target version:	Sprint-2012.09-Block.2.1	Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		

Description

cn-buildout contains software "products" like knb.war and cn.war that are build from other projects -- both within DataONE's purview and other organizations'.

Tagging should probably be something that indicates "1.0.0 for the CN stack" but would not formally be related (via poms) to other d1_* projects.
