

Infrastructure - Task #2318

Story # 2315 (Closed): debian packaging for release

Make debian packages from trunk available for dev deployments

2012-02-10 18:56 - Ben Leinfelder

<b>Target version:</b>	Sprint-2012.09-Block.2.1	<b>Story Points:</b>	
<b>Milestone:</b>	CCI-1.0.0		
<b>Product Version:</b>	*		
<b>Description</b> In addition to stable "production" releases of the cn-buildout products, versions based on trunk should be available for deployment on development machines. There was talk of making this available in a different debian repository, but my feeling is that that would complicate things. Perhaps the following strategy could be used: -using the unversioned name of the debian package will install the latest table production release -using a versioned name of the debian package will install that version of the product -using a "-trunk" or "-snapshot" suffix on the product name will install the debian package as built from trunk.

- Status changed from New to Closed
- Assignee set to Dave Vieglais

Dave did this - the "deb-unstable" packages on hudson work great
