<b>Description</b>			
Instead of a list of checksum algorithms, I get:			
22:12:50 DEBUG operation: GET /cn/v1/checksum			
NotFound: name: NotFound errorCode: 404 detailCode: 1800 description: No system metadata could be found for given PID: ev.dataone.org/cn/v1/checksum PID: None			
Also note the truncated first part of "cn-dev.dataone.org" -- it may be a second issue.

This should be fixed in the latest Metacat, but I don't think it is yet deployed on the cn-dev servers -- was waiting for Robert.

- Status changed from New to Closed

works on my local Metacat, but still needs to be deployed to cn-dev stack.
