

Infrastructure - Feature #2377

Verify that the object format is valid in CLI

2012-02-23 18:16 - Andrew Pippin

Status:	Closed	Start date:	2012-02-23
Priority:	Normal	Due date:	
Assignee:	Andrew Pippin	% Done:	100%
Category:	d1_client_cli	Estimated time:	0.00 hour
Target version:		Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		
Description			
The objecttype variable allows any string to be used. The given value should be validated against the list of valid strings.			

History

#1 - 2012-02-23 18:17 - Andrew Pippin

The list of valid strings is stored on a coordinating node, which may not be available when the value is set. The allowed values should probably be cached locally.

#2 - 2012-02-23 20:30 - Matthew Jones

- Tracker changed from Task to Feature

#3 - 2012-02-23 20:33 - Matthew Jones

- Subject changed from Verify that the object type is valid to Verify that the object format is valid in CLI

#4 - 2012-03-01 22:44 - Andrew Pippin

- Status changed from New to Closed

- % Done changed from 0 to 100

The first time the client tries to set either the @object-format@ or @search-object-format@ session variable, the client will pull all the known formats from the CN (CNCore.listFormats). Any format specified by the customer must be on the list of known formats.
