

Infrastructure - Task #2398

Story # 2395 (Closed): Prepare GMN Installation for public release

User friendly views when visiting member node URLs

2012-02-24 02:14 - Dave Vieglais

Status:	Closed	Start date:	2012-02-24
Priority:	Normal	Due date:	
Assignee:	Roger Dahl	% Done:	100%
Category:	d1_mn_GMN	Estimated time:	0.00 hour
Target version:	Sprint-2012.19-Block.3.2	Story Points:	
Milestone:	CCI-1.0.0		
Product Version:	*		
Description			
<p>Users will see MN URLs in documentation and other locations. It would be most helpful if such URLs resolved to a user friendly page describing the MN.</p> <p>This could be a static page that simply describes the purpose of the node, and perhaps provides some details about who to contact for more information.</p> <p>It may also be appropriate to include some of the basic statistics of the MN operation on such a page.</p> <p>For example, visiting http://gmn-dev.dataone.org should either redirect to a location with ore information, or provide a landing page describing the server.</p>
