I've updated isAuthorized() to insert the symbolic verified user into the equivalent subject list for each person listed (not just the primary). Wrote a metacat test that now succeeds in this scenario. Needs to be tested via d1_integration.

#3 - 2012-03-13 19:50 - Ben Leinfelder

- Status changed from In Progress to Closed

This is woking for me - may have been resolved earlier or as part of other bug fixes related to authorization.
